

INSTITUT FÜR ARBEITSMARKT- UND
BERUFSFORSCHUNG
Die Forschungseinrichtung der Bundesagentur für Arbeit

Research assistant for the project “Effects of the *Pro Kind* intervention in adolescence“ (50%)

Your work environment

The Institute for Employment Research (IAB) is the research department of the Federal Employment Agency (BA). It is one of the leading labour market research institutions in Europe and advises political actors and the professional public based on the latest scientific findings. Your research department is Education, Training, and Employment Over the Life Course (FBD2).

Your tasks and activities

- Participation in a project that evaluates the long term outcomes of primary prevention
- Coordination with project partners
- Development and implementation of a data protection and quality assurance concept
- Preparation and execution of administrative data retrievals
- Processing of longitudinal administrative and self-collected datasets
- Analysis and publication of work and research results

Requirements

- Master degree, preferred disciplines: economics or social science
- In-depth knowledge in a relevant research field, such as health, family or labour economics
- In-depth knowledge in empirical research methods
- In-depth knowledge of statistical analysis methods and programs (e.g. STATA)
- Sound knowledge of project management
- Sound knowledge of presentation techniques
- Very good knowledge of English
- At least some knowledge of German
