

Invitation

Conference on

ARTIFICIAL INTELLIGENCE AND THE ECONOMY

September 15–16, 2023

Berlin, Germany

Conference: Artificial Intelligence and the Economy

Dear BeNA members,

Artificial Intelligence is advancing rapidly, but what are the economic consequences of the new technologies, and their applications?

Our conference will take stock of the state of research on the various impacts Artificial Intelligence may have on economic developments. International scholars will discuss recent research results, and their policy implications. We cordially invite you to join this discussion by [registering online](#) for the conference on **Artificial Intelligence and the Economy** in Berlin, September 15-16.

The conference is organized by [Simon Jäger](#) (MIT, IZA), [Moritz Schularick](#) (Kiel Institute, Sciences Po, and CEPR) and [Cornelia Woll](#) (Hertie School), together with [Robert Gold](#) (Kiel Institute). Confirmed speakers include [Maximilian Kasy](#) (Oxford), [Marianne Saam](#) (ZBW, Hamburg University), and [Martin Beraja](#) (MIT). For more information on the event and program, please visit our [conference website](#).

Registration and attendance are free of charge. The number of participants is limited by space constraints, though. Depending on the number of available seats, we will confirm your attendance after registration.

We look forward to welcoming you at our conference.
